DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12 July 2004 has been entered.

Summary of changes in this action

- I. The amendment overcomes the outstanding indefiniteness. However, the change to claim 5 provides new indefiniteness.
- II. Due to the change in scope of claims 6-7, such are now included in the rejection in view of Park et al.

Claim Rejections - 35 USC § 112

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 5, the recitation of the "second transistor" is confusing with respect to the already recited "second switching transistor". It appears that "second transistor" should be --second sink transistor--.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Park et al. (USPN 5,729,178). Park et al. discloses, in Fig. 8, a circuit comprising: “a pair of differential signal input terminals (V1 and V2)”; “first and second switching transistors (Mc1 and Mc4)”; “third and fourth switching transistors (Mc8 and Mc11)”; “an output stage” having “a first output stage (Mc15 and Mc16)”; “a non-differential output terminal (VCM)”; and “a second output stage (Mc5 and Mc12)”, all connected and operating similarly as recited by Applicant.

Examiner has fully considered Applicant's remarks for the above rejection and has not found them to be persuasive. Applicant remarks all deal with the recitation “for use in a phase lock loop”. However, this language is clearly seen to be intended use recitation. Since the reference to Park et al. is capable of being used with a “phase lock loop”, such meets the claim language.

With respect to claims 6-7, such no longer recite that the “output stages” comprises “a bandgap reference circuit”. The claims now only recite the receipt of “a bandgap reference signal”, which is clearly intended use recitation. Since V2 is capable of being “a bandgap reference signal”, such meets the claim language.
